

FOURTEEN SMALLPOX CASES

Muncie Suddenly Discovers It Has the Plague in Epidemic Form.

Several Local Physicians Have Been Ignorantly Treating the Patients for Chicken-Pox Ever Since Last June.

Thickly Populated District Where Factory Hands Live Is Infected.

Amalgamated Scale at Anderson Signed by the Ironclad Company—Evidence of a Murder at Brazil—Other State News.

THE YELLOW FLAG UP.

Dr. Metcalf Finds an Alarming State of Affairs at Muncie.

MUNCIE, Ind., Aug. 19.—City Health Officer Dr. F. G. Jackson and County Health Officer Dr. Hugh A. Cowing, and Dr. C. N. Metcalf, secretary of the State Board of Health, made public the startling announcement this evening that there are fourteen well developed cases of smallpox in the city of Muncie.

Dr. F. G. Jackson has been carefully inspecting several cases that were being treated for chicken-pox. He, with Dr. Leach, were convinced that the ailment was smallpox, and Dr. Metcalf and Cowing were to-day summoned to make a thorough investigation before the public should be informed. Dr. Metcalf seemed astonished at the situation. A number of the cases have been treated for several weeks. The first case developed in the family of Thomas Murray, on Macdonald avenue, as long ago as in June. At that time five members of the family, including the father, were with the plague, and five persons also in the family of Mrs. Mary Fox, near Murray's, are now down with the disease. One young woman at the home of A. N. Shuttlesworth is dangerously sick, and there are cases at the homes of Arthur Van Metre and Emily Russey. These are all in the southeast part of the city, in the factory district known as "Industry." Another new case at the home of E. Campbell, in the Avondale district, was reported this evening. The following card was issued late this evening:

In connection with the city and county health officers have been notified that fourteen cases of the infected smallpox district. The law must be strictly enforced, and for that purpose the health officers, Dr. Jackson and Cowing, will adopt all necessary regulations to that end. Let every citizen aid them in their efforts to exterminate the disease. I would also ask that the people do not become alarmed or panic-stricken, because the health authorities will take every precaution and will undoubtedly control the spread of the disease.

C. N. METCALF, Secretary State Board of Health.

This evening small-pox flags were distributed and placed conspicuously on each house where the cases are confined. By order of Mayor Brady, Dr. Leach was engaged by the city to take charge of the cases. Dr. Leach was in charge of the disease here in 1926, when there were fifty-two cases. Out of this large number only five persons died. He said that the disease is not as fatal as it is reported to be. He said that the patients have been strictly quarantined, and the disease will be stamped out as quickly as possible.

LABOR MATTERS BRIGHTENING.

Several Mills at Anderson Will Resume Work This Week.

ANDERSON, Ind., Aug. 19.—The labor situation in Anderson to-night is much more hopeful. At noon to-day Secretary Charles Eardman, in behalf of the Ironclad Rolling Mill Company, signed the scale presented by the Amalgamated Association and that industry will resume work Monday. The Amalgamated Association, which will take over the work of the Ironclad Rolling Mill Company, employing 125 men, commences work Tuesday after a shut-down of nearly six weeks. There are still several hundred idle operatives of mills in this city, but several factories are expected to resume work about Sept. 1.

WAS A FOUL MURDER.

Morris Gibson Murdered, Robbed and Picked on the Track at Brazil.

CINCINNATI, Aug. 19.—A dispatch to the Enquirer from Brazil, Ind., says that Coroner Merriam has rendered a sensational verdict in the killing of young Morris Gibson, whose body was found scattered along the Vandallia road from that city to Indianapolis, one entire leg being found on a brake beam by a car inspector at the latter point on Tuesday morning last. It was shown that Gibson was not struck by the train, but that he was foully murdered, being pushed under the cars. He had displayed a roll of money half an hour before, and his face and neck bore evidence of death by strangulation. The money was missing from the corpse.

FEARED MOB VIOLENCE.

Threats to Lynch Cyrus Brown Caused His Removal to Jeffersonville.

COLUMBUS, Ind., Aug. 19.—To-day many men met here to attend a show, and an unusual amount of drinking was indulged in, mingled with threats of mob violence on murderer Brown. Judge Ford waited on the sheriff of the county, in whose custody was Cyrus Brown, the wife murderer, and informed him that it was necessary, in his judgment, that Brown be removed to the southern prison, at Jeffersonville, for safe keeping. The judge at once issued an order to this effect, and the sheriff, with a deputy, quietly left the county jail by a back way with Brown and boarded a train for the south, without being observed by over a dozen persons. Not many of the citizens here believe that a mob would have molested Brown, but all approve of the action of Judge Ford in this preventing a possible occurrence.

Mistrusted His Young Wife.

COLUMBUS, Ind., Aug. 19.—Last Nov. 10, at Plattsburg, just north of this city, Miss Beatrice Pruitt and Charles White were married, and the two began house-keeping. For some time it has been known that the two have been having trouble, and on yesterday afternoon the young wife made known the fact to her brothers, who went to her home and were prepared to take her away with them when White arrived. He ordered them to leave his home, but this they refused to do until they rescued their sister, which was accomplished until White was overpowered and a large knife, with which he had frightened her on several occasions, was taken from him. The matter is now in the courts in the shape of a divorce suit.

Perru Banks Make no Discount.

PERU, Ind., Aug. 19.—In marked contrast to the action taken by many of the local banks throughout the State in refusing to cash pay-roll checks of the Lake Erie & Western and Wabash railways, the First

National and Citizens' National of this city to-day received all checks as presented, paying in full, in face of the fact that the company has not deposited money for their redemption. Somehow the impression got abroad that the bank in this city would not cash the same as was done at other points, and the banks in this city were considerably disturbed over the matter. The action of the bank in thus assisting the men is generally commented on, and the willingness to help when hard times exist.

Fire in the Marion Sucker Factory.

MARION, Ind., Aug. 19.—Fire destroyed the upper half of the Sweeney & Johnson sucker factory here to-day. The fire department was crippled by the repeated breaking of the hose. Insurance men place the loss between \$4,000 and \$5,000. A large amount of stock was destroyed and much of the machinery ruined. The plant was valued at over \$25,000. The cause of the fire is unknown. The insurance is as follows:

Royal, \$2,000; Western of Toronto, \$2,000; Northern, \$2,000; Germania, \$2,000; New York, \$2,000; North British and Mercantile, \$2,500; Niagara, \$1,500; St. Paul Fire and Marine, \$1,000; Fire Association, \$1,000; Pennsylvania Fire, \$1,000; Liverpool, London and Globe, \$1,000. Total, \$16,000.

Tried to Kill an Indianapolis Man.

COLUMBUS, Ind., Aug. 19.—Shortly before noon to-day Walter McGrail, a young man of this city, who recently secured \$1,300 from the Big Four Railroad as damages for a broken arm, and who has since that time been drinking heavily, met Ambrose Dillman, of Indianapolis, on the street here and assaulted him with a knife, cutting his face in a fearful manner, requiring a dozen stitches to close the wound. Dillman was taken into a store, where McGrail made several attempts to get at him again. A few hours afterward McGrail was located in his mother's wood shed, and arrested. A charge of assault and battery with intent to kill was placed against him.

Perishing for the Want of Water.

VERNON, Ind., Aug. 19.—The dry weather has completely dried up all garden vegetation in this section. The streams have ceased to run, wells have failed, and for the first time in the knowledge of the oldest inhabitants have the large and flowing creeks, that are so numerous in this county, nearly dried up. Many farmers have to drive their stock to the streams for water. The corn crops are seriously damaged, and only in the low lands will there be any grain. The fruit crop is almost a complete failure. Vernon has not had a good rain for the past eight weeks and the thing is simply perishing for want of water.

More of Hagan's Money Turns Up.

SHELBYVILLE, Ind., Aug. 19.—To-day's Journal, in a dispatch from this place, stated that John Hagan, blind and deaf, aged sixty years, thought to be poor, had on his death a bandage on his arm containing \$1,200. In searching the house to-day \$1,000 more was found, together with a pension check calling for \$216. He and Miss Hattie Hagan came here from Crawfordsville last spring. He has one daughter living, although disowned by him years ago. He also has a brother in Ireland. The impression is that he will die here. He has had several sessions, but the will has not been found.

Hon. James C. Hart Dead.

MORRISTOWN, Ind., Aug. 19.—Hon. James C. Hart, aged sixty years, died yesterday of general debility and was buried here to-day. Mr. Hart was one of the prominent men of Shelby county and an attorney of ability. He had been a resident of Morrystown for fifty years. In 1822 he secured the first vote of being elected over the Hon. Jacob Muttz, of Edinburgh, as Representative from this democratic county, with its two majorities. His death was a strong drink. By request the funeral services consisted only of a few remarks by his lifelong friend, W. A. Bodine.

Insurance Companies Involved.

UNION CITY, Ind., Aug. 19.—The following insurance companies were involved in the losses by fire last night: "Traders", American of Philadelphia, Hartford of Connecticut, Queen of America, Farmers of New York, Merchants of New Jersey, German of Freeport (Ill.), Lancashire, North British and Mercantile, American Fire of New York, Hartford of Hartford, Western and Phoenix. The loss is nearly \$25,000, and the insurance less than half that. Fire Chief Carson was struck in the head by a falling beam cutting a large gash, and he is confined to his bed.

Jones's Hardware House Burned.

RICHMOND, Ind., Aug. 19.—The large hardware and factory supply house of Jones Brothers, on Fort Wayne avenue, caught fire this morning from spontaneous combustion in the oil-room and was completely gutted. The stock was worth about \$20,000 and comparatively little of it was saved. There was about \$20,000 insurance on the building, which is a total loss. The loss is insured for \$1,500. Prompt and efficient work on the part of the fire department prevented the fire from spreading to the adjoining buildings. They will rebuild at once.

About All Buxton Will Ever Get.

SHELBYVILLE, Ind., Aug. 19.—At a festival given by the Woman's Relief Corps, of this city, last night, a cold-headed cane was voted to the most popular candidate for postmaster. All six of the Democrats who desire to serve their country in that capacity were on the list. William Buxton, ex-county auditor and ex-chairman of Democratic county central committee, was successful candidate, receiving 15 votes. His nearest rival, Ed A. Major, city clerk, got only two votes.

Uncle George Danced a Jig.

FARMLAND, Ind., Aug. 19.—The fifth annual reunion of the Moore family, which numbers about two hundred, was held in the grove of William Moore, four miles south of town, to-day. A fine dinner was spread, at which about five hundred people feasted. The building, which is a total loss, was insured for \$1,500. Prompt and efficient work on the part of the fire department prevented the fire from spreading to the adjoining buildings. They will rebuild at once.

Next Conference at Fairview.

MARION, Ind., Aug. 19.—The Methodist Protestant Conference to-day decided to hold the next annual meeting at Fairview, Shelby county. Rev. J. G. Smith, of Moore'sville, spoke on the work of church extension. The last year, he said, had been the busiest and most important in the history of the board. Appointments will be announced Monday.

Old Settlers' and Soldiers' Reunion.

PERU, Ind., Aug. 19.—The annual meeting of the old settlers of Miami and Howard counties was held to-day at Miami and was one of the largest in the history of the organization. Six thousand people attended. The old soldiers' reunion at Denver to-day was also a grand success. Four thousand people attended the latter.

Prize Fight Somewhere Near Muncie.

MUNCIE, Ind., Aug. 19.—At midnight to-night another prize-fight picnic party left in trucks for an unknown ringside, where Jack Conley, alleged middle-weight champion of Indiana, and Blackie, the colored middle-weight champion of Minnesota, will fight to a finish. The police will drive them out of Delaware county.

McKay's Victim Breathes His Last.

BRAZIL, Ind., Aug. 19.—William Row, who was shot ten days ago and mortally wounded by John McKay, died this evening at 6 o'clock. He was apparently improving until shortly before his death.

Suddenly he grew rapidly worse, and died in a short time.

Death of an Old Madison Banker.

MADISON, Ind., Aug. 19.—Alden Bradford Smith, president of the First National Bank, and for fifty-five years a leading citizen of Madison, died this afternoon, in his eighty-eighth year.

Indiana Notes.

A large barn and contents belonging to George Thornburg, three miles southwest of Farmland, was destroyed by fire yesterday. Loss, \$1,000; no insurance.

The thirty-fourth annual reunion of the old settlers of Wayne county was held on their grounds, near Centerville, yesterday. The crowd was estimated at six thousand. Clapp & Hethersperger's saw mill at Spargerville, Wabash county, was burned Saturday morning. Three Big Four box cars also burned. Loss, about \$8,000; no insurance.

The body of Charles Williams, aged seventeen, was found floating in the harbor at Michigan City yesterday. He had been missing since Tuesday, and suicide is suspected, as he had just lost his place and was having trouble with his mother.

Secretary Hardy, of Pendleton, announces that the seventh annual reunion of the Sixteenth Indiana will be held at Indianapolis, Sept. 4, 1893, at 10 A. M., in Memorial Park, near the city. Ash street and Christian avenue. Comrades at Union Depot will take College-avenue cars and will be met at the depot by but three squares from the church.

TO "CONNER" SILVER.

Report that the Bank of France Is Considering a Scheme to Assist Colorado Producers.

ASPEN, Colo., Aug. 19.—Ex-Senator L. Smith, chairman of the finance committee of the French Senate, has just left Aspen for Park City, U. T. The object of his trip here was to look into the silver producing regions of the United States, and he was sent out by his government to more particularly ascertain the extent of silver production. He came to Aspen with a letter from President Hagerman, of the Mollie Gibson mine. It has leaked out since his departure that the Bank of France would, if desired, establish a branch at Denver; that such a branch might be controlled by a directory composed of Colorado capitalists, the bank simply sending a manager from Paris to represent the parent institution. That they would agree to furnish from fifty to one hundred million dollars or whatever the bank might desire, for the production of silver in Colorado for several years without allowing any to be sold until the price was fully satisfactory. That the bank would not exceed 1 1/2 per cent. per annum. France has a deep interest in the future of silver, and will do everything in its power to assist the silver-producing regions of the United States, and he was sent out by his government to more particularly ascertain the extent of silver production. He came to Aspen with a letter from President Hagerman, of the Mollie Gibson mine. It has leaked out since his departure that the Bank of France would, if desired, establish a branch at Denver; that such a branch might be controlled by a directory composed of Colorado capitalists, the bank simply sending a manager from Paris to represent the parent institution. That they would agree to furnish from fifty to one hundred million dollars or whatever the bank might desire, for the production of silver in Colorado for several years without allowing any to be sold until the price was fully satisfactory. That the bank would not exceed 1 1/2 per cent. per annum.

REINDEER IN ALASKA.

The Herd that Was Transported from Siberia Doing Well in Their New Quarters.

SAN FRANCISCO, Aug. 19.—A letter dated March 18 has been received here from Miner W. Bruce, superintendent of the reindeer station at Port Clarence, Alaska. He writes in regard to a project he has undertaken to bring the reindeer from Siberia to Alaska and endeavor to raise them for the benefit of the Eskimoes and thus furnish clothing and food supply for those people. He states that their source of livelihood is fast being destroyed by the disappearance of the whale, walrus and native deer, and that his nine months' experience there has shown him that statements made by Rev. Dr. Sheldon Jackson, general agent of education of Alaska, as to the destitute condition of the Eskimoes are true. He has not been overdrawn. Mr. Bruce writes as follows regarding the herd of deer which he has brought from Siberia: "Our herd has been thriving in the splendid state and they are sleek and fat. The climate is well adapted to successful raising of deer and I believe that the reindeer is all that its friends could wish. We have lost but eight deer since September last, and most of these had to be killed because of the disease. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer. Our coldest weather was about 18° below zero, and for over a month the temperature averaged 18° below zero. The reindeer is a hardy animal and is well adapted to the climate of Alaska. The herd has wintered in sight of the station and exploration in different directions show me and feed sufficient to sustain thousands of deer.
